Commandant of the installation, which was periodically inspected by officers of the War Ministry, was a Rumanian colonel. Fight to 10 field grade officers were assigned to the installation as instructors. No Soviet soldiers were seen there. The trainees of this school did not bear arms while they were in the area of the installation. When units were marched out, half of them were armed with rifles, the other half with submachine guns. No motor vehicles were seen except for some sedans. Detachments of up to 200 men frequently went to Mocrea (R 26/U \(\frac{1}{2} \text{8} \)) where, target ranges and a training area were available.	25) 25)

The trainees of this school did not bear arms while they were in the area of the installation. When units were marched out, half of them were armed with rifles, the other half with submachine guns. No motor vehicles were seen except for some sedans. Detachments of up to 200 men frequently went to Mocrea (R 26/U \(\frac{1}{2} \) where, target ranges and a training area were available. The courses for officer candidates lasted one year, while captains and lieutenants stayed for 8 to 10 weeks at the school. In 1950, one training course was completed in the fall. Another barracks installation was under construction on the northern bank of the Crisul Alb River. The payments for this construction work were made.	25) 25)
